Comp No. 27113

To,

The Director

NIT/IIT (As per standard TPQAA list).

Sub: Third Party Quality Assurance in construction of Eklavya Model Residential School. Timely TPQA inspection & model TPQA report Format for reporting regarding.

Sir,

National Education Society for Tribal Students (NESTS) under Ministry of Tribal Affairs, Govt of India has been entrusted with the responsibility of construction of more than 452 Eklavya Model Residential Schools (EMRSs) across the country. NESTS has further entrusted the responsibility of construction of most of EMRS to Public Sector Undertaking (PSU)s engaged in the field of construction.

The quality and timeline of construction of these schools is being monitored at the highest level as Hon'ble PM has himself laid the foundation of more than 50 such schools and Hon'ble President has inaugurated several such schools. Secretary, Tribal Affairs has been closely reviewing quality & progress of the EMRS project from time-to-time.

With this background, for quality assurance in construction of EMRS, NITs and IITs have been engaged as a Third-Party Quality Assurance (TPQA) agency and have been entrusted the responsibility of ensuring quality of construction and monitoring the work of PSUs. For this purpose, Tri-Partite Agreements among NESTS, the Construction Agency (Public Sector Undertakings) and the NIT/IIT have been entered into.

On perusal of reports submitted by the TPQA agencies, it has been observed that NESTS TPQA guidelines dated 20.04.2022 are not being taken into cognizance while reporting quality issues. TPQA agencies are not giving elaborate comments on all important activities such as quality of RCC, Brickwork, finishing, doors & windows and quality of materials i.e. steel, cement, sand, bricks and workmanship i.e. alignment, line, etc of structure. Frequency and stages of TPQA visits are irregular and sometimes TPQA agencies are visiting the site with a gap of 06 months or more. As a result, the quality of many critical activities is unreported. TPQA agencies are also not serious to get timely compliances from PSUs on defective works and quality issues noticed during inspection. Further, TPQA agencies have not been uploading the TPQA reports on dashboard http://emrs.tribal.gov.in despite being given their user IDs, password and necessary training support for real-time reporting of the quality issues. Thus, the basic purpose of Third-Party Quality Assurance is not up to the mark as desired.

In the meantime, to facilitate comprehensive reporting, NESTS, through various discussions at NESTS, has developed a Model TPQA Format for providing explanatory comments on the important activities of each building and other services of an EMRS project. TPQA agency has already been equipped with mobile application App for reporting and updating the quality issues from construction site on real-time basis.

Page 1 of 2

Therefore, in view of the above, TPQA activities shall be as under: -

- 1. Model TPQA Report Format shall be adopted for reporting purpose henceforth.
- 2. Report shall be uploaded within a week after the completion of inspection.
- 3. Vetting and acceptance of compliance of quality issues, shall be submitted latest by subsequent visit
- 4. NESTS TPQA Guidelines dated 20.04.2022 shall be followed so as to cover inspection of all critical activities
- 5. Report & Compliances shall be uploaded on dashboard http://emrs.tribal.gov.in in an expedited manner.

Timely TPQA inspection and submission of report by the TPQA team will help in achieving quality construction and timely completion of the projects.

This issues with the approval of competent authority please.

Yours faithfully,

(K. C. Meena) Additional Commissioner

Enclosure: Model TPQA Report Format.

|            | Annexure – I   |   |
|------------|--|---|
| Sr.<br>No. | List of Equipment available For Field Testing Laboratory   | Comments of TPQA (Functional or not Functional) |
| A.         | For Building Works   |   |
| 1          | Balances   |   |
| (i)        | 7 kg. to 10 kg. capacity, semi-self-indicating type – accuracy 10 gm.  |   |
| (ii)       | 500 gm. capacity, semi-self-indicating type – accuracy 1 gm.   |   |
| (iii)      | Pan balance – 5 kg. capacity – accuracy 10 gms.  |   |
| 2          | Ovens-electrically operated, thermostatically controlled upto 110 C – sensitivity 1 C.   |   |
| 3          | Sieves: as per IS 460=1962.  |   |
| (i)        | I.S. sieves – 450mm internal dia, of size100 mm, 80 mm, 63 mm, 50 mm, 40 mm, 25 mm, 20 mm, 12.5 mm, 10 mm, 6.3 mm, 4.75 mm, complete with lid and pan.                                 |   |
| (ii)       | I.S. sieves- 200mm internal dia (brass frame) consisting of 2.36mm, 1.18mm, 600 microns, 425 microns, 300 microns, 212 microns, 150 microns, 90 microns, 75 microns, with lid and pan. |   |
| 4          | Sieve shaker capable of 200 mm and 300 mm dia sieves, manually operated with timing switch assembly.   |   |
| 5          | Equipment for slump test- Slump cone, steel plate, tamping rod, steel scale, scoop.  |   |
| 6          | Dial gauge, 25 mm travel – 0.01 mm/division least count - 2nos.  |   |
| 7          | 100 tonnes compression testing machine, electrical-cum manually operated.  |   |
| 8          | Graduated measuring cylinders 200 ml capacity – 3 Nos.   |   |
| 9          | Enamel trays (for efflorescence test for bricks).  |   |
| (i)        | 300 mm x 250 mm x 40 mm- 2 nos.  |   |
| (ii)       | Circular plates of 250 mm dia – 4 nos.   |   |

|            |      |                                   |                                      |                             |                          |                             |                                     |         |
|            |      |                                   |                                      |                             |                          |                             |                                     |         |
|            |      |                                   |                                      |                             |                          |                             |                                     |         |
|            |      |                                   |                                      |                             |                          |                             |                                     |         |

Note: If the number is less than that required, then reasons shall be recorded.

- 1. Signature of Site Engineer.....
- 2. Signature of Project Manager.....
- 3. Signature of Zonal Manager.....

### Annexure - IV

### **Check Lists for Various Items**

### PART – A

### **CHECK LIST FOR ITEMS OF FOUNDATION CONCRETE**

| Name of work  |  |               |  |  |  |  |  |
|---|--|---------------|--|--|--|--|--|
| Name of contractor  |  |               |  |  |  |  |  |
| Agreement No  |  |               |  |  |  |  |  |
| 4. Date of inspection   | Date of inspection                             |               |  |  |  |  |  |
| 5. Location   |  |               |  |  |  |  |  |
| 6. Material used for concrete whethe                            | r tested                                       |               |  |  |  |  |  |
| (a) Sand  |  | Yes/No        |  |  |  |  |  |
| (b) Coarse aggregate  |  | Yes/No        |  |  |  |  |  |
| (c) Water   |  | Yes/No        |  |  |  |  |  |
| (d) Admixture, if any   |  | Yes/No        |  |  |  |  |  |
| 7. Raft top level, whether provided as                          | per details                                    | Yes/No        |  |  |  |  |  |
| 8. Architectural/structural drawing co                          | rrelated                                       | Yes/No        |  |  |  |  |  |
| <ol><li>Whether location of construction jo</li></ol>           | oint has been discussed with Executive         |               |  |  |  |  |  |
| Engineer, and he has approved it                                |  | Yes/No        |  |  |  |  |  |
| 10. Cleaning over water proofing surface                        | ce and construction joint done                 | Yes/No        |  |  |  |  |  |
| 11. CC cover blocks of 60 mm, thicknes                          | s provided (min 2 in one square metre area)    | Yes/No        |  |  |  |  |  |
| 12. Reinforcement placement as per re                           | elevant structural drawing checked             | Yes/No        |  |  |  |  |  |
| 13. Layout of columns as per relevant s                         | tructural drawing checked                      | Yes/No        |  |  |  |  |  |
| <ol><li>Placement of shuttering plates and<br/>Yes/No</li></ol> | key board for proper construction joint with s | huttering oil |  |  |  |  |  |
| 15. Cement slurry applied on construct                          | ion joint before pouring of concrete           | Yes/No        |  |  |  |  |  |
| 16. Trained mason available                                     |  | Yes/No        |  |  |  |  |  |
| 17. Concreting to start from farthest po                        | pint to nearest point with respect of          |               |  |  |  |  |  |
| weight batching plant   |  | Yes/No        |  |  |  |  |  |
| 18. Concrete mix has been designed                              |  | Yes/No        |  |  |  |  |  |
| 19. Plasticiser being used                                      |  | Yes/No        |  |  |  |  |  |
| 20. Adequate number of concrete vibra                           | ators in working condition available           | Yes/No        |  |  |  |  |  |
| 21. Slump checked   |  | Yes/No        |  |  |  |  |  |
| 22. Sample cubes taken  |  | Yes/No        |  |  |  |  |  |
| 23. Signature of Site Engineer                                  |  |               |  |  |  |  |  |
| 24. Signature of Project Manager                                |  |               |  |  |  |  |  |

#### PART - B

### **CHECK LIST FOR COLUMNS/BEAMS/SLABS**

- 1. Date of inspection
- 2. Drawing No.
- 3. Location
- 4. Whether materials used conform to relevant Specifications

| т.  | Whether materials used comorm to relevant specifications            |        |
|-----|---|--------|
|     | (a) Sand  | Yes/No |
|     | (b) Coarse aggregate  | Yes/No |
|     | (c) Water   | Yes/No |
|     | (d) Admixture, if any   | Yes/No |
| 5.  | Whether structural drawings correlated with architectural drawings? | Yes/No |
| 6.  | Whether the centre line of column/beams checked with references     |        |
|     | to grid lines as per architectural drawings?                        | Yes/No |
| 7.  | Whether treatment of expansion joint, wherever required, is done?   | Yes/No |
| 8.  | Whether cleaning, repairing and approval of shuttering plate,       |        |
|     | application of quality shuttering oil is done?                      | Yes/No |
| 9.  | Whether shuttering is in true plumb and vertical and properly       |        |
|     | done and maintained during concreting?                              | Yes/No |
| 10. | Whether reinforcement detailing, their placement are as per         |        |
|     | structural drawings?  | Yes/No |
| 11. | Whether proper gauge binding wire is used and with full cross       |        |
|     | binding and tightening of reinforcement bars with stirrups?         | Yes/No |

- 13. Whether stainless steel cramps, angle irons for holding stones and any holding arrangement for electrical/mechanical/fire-fighting/other services have been seen and approved by JE (E)/AE (E) Yes/No
- 14. Whether conduits for various electrical/mechanical/fire-fighting/ other services have been seen and approved by JE (E)/ AE (E)

12. Whether required minimum cover to reinforcement is maintained?

Yes/No

Yes/No

15. Whether concrete of approved design mix within maximum permissible water-cement ratio is used?

Yes/No

16. Whether admixture of good brand quality approved by Engineer-in-charge is used?

Yes/No

17. Whether technical supervision at batching plant/mixer and at point of concreting done?

Yes/No

18. Whether concreting is placed within initial setting time of mixing? 19. Whether proper compaction with vibrator is done?

20. Whether the concreting has been done in a lift not exceeding 1.5 m?

Yes/No Yes/No

21. Whether cubes as per requirement filled for testing? 22. Signature of Site Engineer..... Yes/No Yes/No

- 23. Signature of Project Manager.....

### Post-concreting:

24. Whether shuttering stripped off as per specification, and laitance removed immediately thereafter? Yes/No

### NESTS/Civil/TPQA/49/2020-21/560(PART-I)

### 336180/2024/NESTS

- 25. Whether proper arrangement of curing and curing period maintained as per specifications? Yes/No
- 26. Whether hacking of RCC surface by proper hacking tool for subsequent plastering/finishing is carried out?

  Yes/No
- 27. Signature of Site Engineer.....
- 28. Signature of Project Manager.....

### PART – C

### **CHECK LIST FOR BRICK WORK**

| 1. Date of Inspection  |                 |
|--|-----------------|
| 2. Drawing No.   |                 |
| 3. Location  |                 |
| 4. Whether materials used conform to relevant Specifications and whether mandate                             | ory tests done? |
| (a) Sand   | Yes/No          |
| (b) Bricks   | Yes/No          |
| (c) Water  | Yes/No          |
| 5. Whether structural drawings co-related with architectural drawings?                                       | Yes/No          |
| 6. Whether the centre line of brickwork checked with reference to grid lines as per                          | architectural   |
| drawings?  | Yes/No          |
| 7. Whether bricks soaked in water before use for sufficient period?  | Yes/No          |
| 8. Whether queen closers are used at junction of walls?  | Yes/No          |
| 9. Whether brickwork is in true plumb and vertical and all layers truly horizontal?                          | Yes/No          |
| 10. Whether graduated wooden straight edge storey rod being used for   |                 |
| keeping height of brick courses uniform?   | Yes/No          |
| 11. Whether wall height being constructed in a day is being restricted to 1 m height?                        | Yes/No          |
| 12. Whether parts of wall left at different levels are raked back at an angle                                |                 |
| of 45 degrees or less with the horizontal? (Toothing is not to be permitted)                                 | Yes/No          |
| 13. Whether top courses of all plinths, parapets, steps and top of walls below                               |                 |
| floor and roof slabs laid with brick on edge? Whether marucona provided                                      |                 |
| at corners in such brickwork?  | Yes/No          |
| 14. Whether thickness of joints in brickwork is kept 1 cm +_ 20%?  | Yes/No          |
| 15. Whether mortar of approved mix within maximum permissible  |                 |
| water cement ratio is used?  | Yes/No          |
| 16. Whether all horizontal and vertical joints are being filled?   | Yes/No          |
| <ol> <li>Whether proper arrangement of curing and curing period maintained as per spec<br/>Yes/No</li> </ol> | ification?      |
| 18. Whether date of work done written?   | Yes/No          |
| 19. Signature of Site Engineer   |                 |
| 20. Signature of Project Manager   |                 |

### PART - D

### **CHECK LIST FOR PLASTERING**

| 1.  | Date of inspection   |                  |
|-----|--|------------------|
| 2.  | Drawing No.  |                  |
| 3.  | Location   |                  |
| 4.  | Whether materials used conform to relevant specifications and whether  |                  |
|     | mandatory tests done?  | Yes/No           |
| 5.  | Whether surface cleaned of all loose mortar and efflorescence?   | Yes/No           |
| ŝ.  | Whether all conduiting and electrical piping done?   | Yes/No           |
| 7.  | Whether all doors, windows etc. fixed?   | Yes/No           |
| 3.  | Whether all defects of brickwork/CC/RCC rectified?   | Yes/No           |
| Э.  | Whether preparation of surface done?   | Yes/No           |
| 10. | Whether 2.5 m long aluminium straight edge and plumb bob being used to check   | vertically and   |
|     | evenness of surface? Yes/No  |                  |
| 11. | Whether 15 cm x 15 cm bunda at every 2 m horizontally and vertically   |                  |
|     | being provided to serve as gauges?   | Yes/No           |
| 12. | Whether uniform groove provided at junctions of all plaster and ceiling plaster?   | Voc/No           |
| 13. | branch and branch branch and process and process and process.  | Yes/No           |
|     | Whether mortar of approved mix within maximum permissible  | res/No           |
|     |  | Yes/No           |
| 14. | Whether mortar of approved mix within maximum permissible  | ·                |
| 14. | Whether mortar of approved mix within maximum permissible water cement ratio is used?  | ·                |
|     | Whether mortar of approved mix within maximum permissible water cement ratio is used? Whether proper arrangement of curing and curing period                                   | Yes/No           |
| 15. | Whether mortar of approved mix within maximum permissible water cement ratio is used? Whether proper arrangement of curing and curing period maintained as per specifications? | Yes/No<br>Yes/No |

### PART – E

### **CHECK LIST FOR WATER SUPPLY LINES**

| 1.  | Date of inspection  |        |
|-----|---|--------|
| 2.  | Drawing No.   |        |
| 3.  | Location  |        |
| 4.  | Whether materials used conform to relevant specifications and whether |        |
|     | mandatory tests done?   | Yes/No |
| 5.  | Whether plumber employed is licensed plumber or not?                  | Yes/No |
| 6.  | Whether plan for piping system has been prepared and got approved?    | Yes/No |
| 7.  | Whether all pipes and fittings are ISI marked?                        | Yes/No |
| 8.  | Whether a sample system has been prepared and got approved?           | Yes/No |
| 9.  | Whether clamps provided at specified spacing?                         | Yes/No |
| 10. | . Whether pipe lines checked at required pressure before covering?    | Yes/No |
| 11. | . Whether weight of flushing pipe checked?                            | Yes/No |
| 12. | . Whether flushing cistern is ISI marked and internally painted       |        |
|     | with bitumastic paint?  | Yes/No |
| 13. | . Whether fittings like wash basin, sink pan, cistern, bib cock,      |        |
|     | stop cock, wheel valves, etc. are ISI marked?                         | Yes/No |
| 14. | . Whether PVC water storage tank is ISI marked? If not, whether       |        |
|     | sample sent for testing?  | Yes/No |
| 15. | . Signature of Site Engineer  |        |
| 16. | . Signature of Project Manager  |        |

# Section 10.2

| SN | Item                    | Details   |
|----|-------------------------|---|
| 1  | Reinforcements          | *Whether reinforcements are as per the vetted drawings?  * Check reinforcement and ring are provided in confinement Zone and column beam junction as per ductile CODE IS 13920  *Check laps are provided in lapping zone and lapping shall not be more than 50% at one location  * Check U hooks at Junction  * Check for required cover to RCC |
| 2  | Centring & Shuttering   | *Check for material (Steel Shuttering & MS Props)  * Check for stability, base support, levelling & fixing, etc   |
| 3  | Casting Quality         | *Check for honeycomb, bulging, deflection, twisting, out of plumb, etc.  * Check for thickness as per vetted drawings  * Check whether Construction Checklist (Annexure IVA & IVB) is followed at site  |
| 4  | Curing Quality          | Whether date of casting mentioned & curing being attended   |
| 5  | Filling in Plinth       | Filling to be done in layers well compacted at OMC.   |
| 6  | Brick Work              | *Check for bond, thickness of mortar, plumb and alignment.  *Check whether Construction Checklist (Annexure IVC) is followed at site  |
| 7  | Half brick work         | Every third course shall have bars as per Specification   |
| 8  | Plaster (18/15/12/6 mm) | *Check for thickness *Check whether Construction Checklist (Annexure IVD) is followed at site   |

# Section-10.3

# **List of Mandatory Tests**
